CUSTOMIZE

Choose from a wide range of features and options including wood types, handrails, light fixtures and cab styles. SEES will work with you to bring your vision to life.

MACHINE ROOM-LESS

No hydraulic cylinder, machine room or hydraulic oil. Instead, S.H.E. uses a small electric motor which fits within the hoistway overhead.

ENERGERY SAVINGS

Thanks to the efficient motor and traction equipment, S.H.E. energy savings are estimated at 70-80% compared to hydraulic elevators.

WHY A SEES HOME ELEVATOR?

All SEES Home Elevators come with the SEEScreen Electronic Door Detector, designed to ensure maximum passenger safety. The SEEScreen's 94 infrared beams act as an invisible safety curtain across the door entrance. When an obstacle breaks the screen, the sensors detect it and immediately stop the elevator to avoid any accidents.

CONVENIENCE

S.H.E. improves in-home mobility and gives you the freedom to safely access any floor with ease.

INVESTMENT

S.H.E. is a sound investment and will increase your home's value and expand its marketability.

FLEXIBILITY

Purchase the S.H.E. with or without the cab. SEES will work with you to design and build exactly what you want.

MADE IN THE U.S.A.

S.H.E. is constructed from the finest materials at the SEES Modernization Center in Fort Lauderdale.
